CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE AND SIX MONTHS ENDED
JUNE 30, 2014 AND JUNE 30, 2013,
AND INDEPENDENT ACCOUNTANTS' REVIEW REPORT

Independent Accountants Report

English Translation of a Report Originally Issued in Korean

To the Shareholders and Board of Directors of Ssangyong Motor Company:

We have reviewed the accompanying consolidated interim financial statements of Ssangyong Motor Company (the "Company"). The financial statements consist of the consolidated statements of financial position as of June 30, 2014 and December 31, 2013, and the related consolidated statements of comprehensive income, consolidated statements of changes in shareholders' equity and consolidated statements of cash flows, all expressed in Korean won, for the three and six months ended June 30, 2014 and 2013, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated interim financial statements

The Company's management is responsible for the preparation and fair presentation of the accompanying consolidated interim financial statements and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Independent accountants' responsibility

Our responsibility is to express a conclusion on the accompanying consolidated interim financial statements based on our review. We conducted our review in accordance with standards for review of consolidated interim financial statements in the Republic of Korea. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Review conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements of the Company are not presently fairly, in all material respects, in accordance with Korean International Financial Reporting Standards (K-IFRS) 1034 Interim Financial Reporting

Other matters

We have given an opinion on the comparative consolidated statement of financial position as of December 31, 2013, and the related consolidated statements of income, retained earnings, and cash flows on March 17, 2014, as fairly state. There is no difference in terms of importance between comparative purposed consolidated financial position on December 31, 2013, and current financial position.

August 28, 2014

Notice to Readers

This report is effective as of August 28, 2014, the accountants' review report date. Certain subsequent events or circumstances may have occurred between this review report date and the time the report is read. Such events or circumstances could significantly affect the accompanying consolidated interim financial statements and may result in modifications to the accountants' review report.

SSANGYONG MOTOR COMPANY AND ITS SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
AS OF AND FOR THE SIX MONTHS ENDED JUNE 30, 2014 AND 2013

1. GENERAL:

(1) Patent Company overview and recent changes in business environment

Ssangyong Motor Company and its subsidiaries (“the Company”) were incorporated on December 6, 1962, and listed its stocks on the Korea Stock Exchange in May of 1975. The Company is headquartered in Chilgeo-dong, Pyungtaek and its factories are located in Pyungtaek, Kyeonggi-do and Changwon, Kyeongsangnam-do. The Company manufactures and distributes motor vehicles and parts.

(2) Major shareholders

The Company’s shareholders as of June 30, 2014, are as follows:

Name of shareholder	Number of shares owned	Percentage of ownership (%)
Mahindra & Mahindra Ltd.	99,964,502	72.85
Treasury stock	21,706	0.02
Others	37,233,888	27.13
	137,220,096	100.00

2. SIGNIFICANT ACCOUNTING POLICIES:

The Company’s summarized consolidated interim financial statement, its period belong to annual financial report, adopts Korean International Reporting Standards (“K-IFRS”) 1034. The audited consolidated financial statement, December 31, 2013, is used to understand the consolidated interim financial statement.

The account policy is identified with the audited financial statement of December 31, 2013, except for the account policy explained as follow.

1) First-time adoption of IFRSs and its description (change in account policy) are as follow:

Amendments to K-IFRS 1032 – *Financial Instruments: Presentation*

The amendments to K-IFRS 1032 clarify existing application issue relating to the offset of financial assets and financial liabilities requirements. Company’s right to offset must not be conditional on the occurrence of future events but enforceable anytime during the contract periods, during the ordinary course of business with counterparty, a default of counterparty and master netting agreement or in some forms of non-recourse debt. The amendments do not have impact on interim financial statement.

Amendments to K-IFRS 1110, K-IFRS 1112 and K-IFRS 1027 – *Investment Entities*

The amendments introduce an exception to the principle under K-IFRS 1110 that all subsidiaries shall be consolidated and require a reporting entity that meets the definition of an investment entity not to consolidate its subsidiaries but instead to measure its subsidiaries at fair value through profit or loss in its consolidated and separate financial statements. In addition, consequential amendments have been made to K-IFRS 1112 and K-IFRS 1027 to introduce new disclosure requirements for investment entities. The amendments do not have impact on interim financial statement.

Amendments to K-IFRS 1039 – Financial Instruments: Recognition and Measurement

The amendments to K-IFRS 1039 allows the continuation of hedge accounting when a derivative is novated to a clearing counterparty or entity acting in a similar capacity and certain conditions are met. The amendments do not have impact on interim financial statement.

Amendments to K-IFRS 2121 – Levies

K-IFRS 2121 defines a levy as a payment to a government for which an entity receives no specific goods or services. The interpretation requires that a liability is recognized when the obligating event occurs. The obligating event is the activity that triggers payment of the levy and is typically specified in the legislation that imposes the levy. The interpretation does not have impact on interim financial statement.

The list above does not include some other amendments, such as the Amendments to K-IFRS 1036 relating to recoverable amount disclosures for non-financial assets, but the amendments do not have impact on interim financial statement.

2) New and revised IFRSs in issue but not yet effective

The Company has not applied the following new and revised IFRSs that have been issued but are not yet effective.

Amendments to K-IFRS 1019 – Employee Benefits

The amendments to K-IFRS 1019 allow past service costs not earned are immediately recognized as expense in the early day of when revision or reduction of the system occurs and when related restructuring cost or dismissal allowance is recognized. The amendments to K-IFRS 1019 are effective for annual periods beginning on July 1, 2014. The Company is in the process of evaluating the impact on the financial statements upon the adoption of amendments.

There are some other amendments made to K-IFRSs as part of the Annual Improvements, which has not resulted in material effects on the Company's financial statements.

The Indian-Rupee amounts presented in these financial statements were computed by translating the Korean won into Indian-Rupees based on the Bank of Korea Basic Rate (₩1 to Rs. 0.0591 at June 30, 2014), solely for the convenience of the reader. These convenience translations into Indian-Rupees should not be construed as representations that the Korean won amounts have been, could have been, or could in the future be, converted at this or any other rate of exchange.

3. CRITICAL ACCOUNTING ESTIMATES AND ASSUMPTIONS:

In the preparation of the Company's interim separate financial statements, management is required to apply accounting policies and make judgments, estimation and assumptions affecting the carrying amounts of assets and liabilities, income and expenses. The estimation and assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may be different from those estimations. The management's significant judgements about the application of the Company's accounting policies and the main resources of the uncertainty are consistent with those of the annual separate financial statements for the year ended December 31, 2013.

4. CASH AND CASH EQUIVALENTS:

Cash and cash equivalents include cash on hand and in banks (MMDA) and highly liquid short-term financial instruments that may be easily converted into cash and whose risk of value fluctuation is not material.

5. RESTRICTED FINANCIAL ASSETS:

Restricted financial assets as of June 30, 2014 and December 31, 2013, are as follows:

(2) Credit risk and allowance for doubtful accounts

The above trade and non-trade receivables and other receivables are classified as loans and receivables and measured at amortized cost.

If a credit risk occurs with respect to a dealership sale, which is a major type of the Company's sales, the respective dealership bears all of the risk; the Company manages credit risk on product sales using two management indexes, agreed liability rate and agreed excess rate, and when the management index exceeds the agreed rate, it imposes a release restriction on the respective dealership and transfers a credit risk arising from product sales.

The Company's trade receivables are usually collected within 30 days but some of the notes receivable are collected within 75 days. Based on the past experience, receivables that are overdue for more than one year are usually not collected, and the Company reserves the full amount of those receivables as an allowance for doubtful accounts. The Company estimates an allowance for the receivables that are overdue for more than 90 days but less than one year through an individual analysis based on each transacting party; for receivables that are not subject to individual analysis, the Company estimates an allowance based on the historical loss rates.

Some of the trade receivables that are overdue for more than 90 days are not included in the above trade receivables (refer to the aging analysis below); the Company did not reserve an allowance for the aforementioned receivables since their credit ratings did not change materially, and they are expected to be collected. The Company has no collaterals pledged or credit enforcement provided for the aforementioned receivables and does not have a legal right to offset those receivables with the debt of the transacting parties.

Aging analysis of the trade and non-trade receivables that are overdue but are not impaired as of June 30, 2014 and December 31, 2013, are as follows:

The Company estimates allowances for doubtful accounts through individual analysis, and an allowance for the receivables that are not subject to separate individual analysis is estimated based on the historical collection rates. For troubled receivables (default, liquidation, bankruptcy, court receivership, workout, disappearance, full-scale capital erosion, etc.), the Company assesses collectability of each receivable through an individual analysis and reserves 100% allowance. For the receivables that are not subject to individual analysis, the allowance is estimated by applying the average loss rate for the past three years to the remaining balance of the receivables at the end of a reporting period; the three-year average loss rate is calculated by dividing the amount of actual loss occurred in the past three years by the average balance of the receivables.

33. FINANCIAL INSTRUMENTS:

(1) Capital risk management

The Company manages capital risk in order to maximize shareholders' profit by maintaining sound/optimal capital structure through monitoring of financial ratios, such as debt to equity ratio and net borrowings to equity ratio on a monthly basis and implements capital structure improvement plan when necessary.

The Company uses debt ratio as a capital management index and calculates the ratio as total liabilities divided by total equity. Total liabilities and total equity are based on the amounts stated in the financial statements.

The Company is not subject to externally enforced capital regulation.

Debt ratio as of June 30, 2014 and December 31, 2013, are as follows:

(3) Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

Financial assets that are subject to the financial risk management consist of cash and cash equivalents, AFS financial assets, trade receivables, other receivables and others; financial liabilities subject to the financial risk management consist of trade payables, other payables, borrowings, bonds and others.

1) Market risk

a. Foreign currency risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company assesses, manages and reports, on a regular basis, the foreign currency risk for its receivables and payables denominated in foreign currency.

The table below shows the sensitivity for each foreign currency when exchange rates change 10%. Sensitivity analysis only includes foreign currency monetary items that are not paid, and it adjusts the translation assuming exchange rate changes 10% at the period -end of June 30, 2014.

Current income will increase when FX rate increases (weaker KRW); likewise, current loss will increase, when FX rate decreases (stronger KRW) with respect to the relevant currency as per following table.

(Unit: Korean won in thousands):

Currency	Korean won in thousands		Indian-Rupee in thousands	
	10% increase	10% decrease	10% increase	10% decrease
USD	₩ 9,443,190	₩ (9,443,190)	Rs. 558,093	Rs. (558,093)
EUR	2,217,737	(2,217,737)	131,068	(131,068)

Others	801,517	(801,517)	47,370	(47,370)
	₩ 12,152,861	₩ (12,152,861)	Rs. 718,235	Rs. (718,235)

In order to minimize the risk of foreign exchange fluctuation, the company has a policy of entering into foreign exchange forward agreement, which is accounted for as hedge accounting for future expected transactions.

The cumulative benefits of cash flow hedging related to forward contracts deferred to equity, amount to 8,043,400 thousand won (Rs. 475,365 thousands), and this amount will be reclassified as current income or loss, when the contracts are settled. Future transactions related to forward transactions will occur within twelve months at the latest starting from the end of current period.

b. Interest rate risk.

Sensitivity analysis was conducted assuming in the case of floating rate debt current balance is the same during the whole reporting period. When reporting interest rate risk to management internally, 0.5% variation is used, representing management's assessment about reasonably occurable fluctuations of interest rates.

When other variables are constant and the interest rate is lower or higher by 0.5% than the current rate, the Company's current income will decrease/increase ₩74,384 thousands (Rs. 4,396 thousands) for the year ended June 30, 2014, due

to floating rate debt's interest rate risk.

2) Credit risk

Credit risk arises from transactions in ordinary course of business and investment activities and when a customer or a transacting party fails to perform obligations defined by respective contract terms. In order to manage the aforementioned credit risk, the Company regularly assesses credit ratings of its customers and transacting parties based on their financial status and past experiences and establishes credit limit for each customer or transacting party.

As of June 30, 2014 and December 31, 2013, the maximum exposed amounts of credit risk for financial assets maintained by the Group are as follows. However, the value of acquired collaterals and the effects from other credit enhancement is not considered.

Trade and other receivables	₩ 239,750,157	₩ 259,055,047	Rs. 14,169,234	Rs. 15,310,153

3) Liquidity risk

The Company establishes short-term and long-term fund management plans; consequently, exposures to liquidity risk. The Company analyzes and reviews actual cash out flows and its budget to correspond the maturities of financial liabilities to those of financial assets. Management of the Company believes that the financial liabilities may be redeemed by cash flows arising from operating activities and financial assets. To manage risks arising from installment sales receivables, the Company has entered into a factoring agreement with capital financial institutions.

(4) Fair value of financial instruments

1) The fair value of the Company's actively traded financial instruments (i.e., financial assets AFS and others) is based on the traded market price as of the reporting period end. The fair value of the Company's financial assets is the amount which the asset could be exchanged for or the amount which a liability could be settled for.

2) Valuation methods and assumptions applied in fair value measurement

The fair values of financial instruments (i.e., Government bonds and unsecured corporate bonds) traded on active markets are determined with reference to quoted market prices. The Company uses the closing price as the quoted market price for its financial assets.

The fair values of derivatives where no active market exists or where quoted prices are not otherwise available are determined by using valuation techniques. Non-option derivatives are evaluated by discounted cash flow method using the yield curve available. Options are evaluated by option pricing models. Foreign exchange forward contracts are determined using the yield curve derived from market interest rates with the same maturity of forward contracts. To measure interest rate swaps, the cash flows are estimated by the yield curve derived from market interest rate and discounted to calculate the present value of swaps.

Fair values of other financial assets and liabilities (except those stated above) are calculated by generally accepted valuation models based on discounted cash flow analysis.

Equity instruments and debt instruments measured at fair value where no active market exists are composed of the financial statements. They are estimated by discounted cash flow method and others, but some of applied assumptions are not grounded on observable market price and ratio.

3) The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, classified as Level 1, 2 or 3, based on the degree to which the fair value is observable.

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and

Level 3 Inputs that are not based on observable market data.
